<Island Trails Lanka (Pvt) Ltd>

<Web-Based Tour and Tourism Management System>

Software Engineering | SE2030
B.Sc. (Hons) in Information Technology

Project Overview

Island Trails Lanka (Pvt) Ltd is a Sri Lankan travel company that helps local and foreign tourist plan trips around the country. Currently, bookings are handled manually through phone calls, emails, WhatsApp, and social media, with staff recording and cross-checking every request by hand. The goal is to digitize the full booking journey – tour and package browsing, resource booking, Trip planning, payment and customer support – into a single web-based platform, reducing manual workload and making the service available 24/7.

Users of the System

- Customer (Tourist) - Searches, books, and pays for tours, transport, and hotels.
- Tour Operations Manager - Manages resources and prevents double booking.
- Travel Consultant - Oversees automated itinerary matching and quotations.
- Finance & Administration Officer - Manages payments, refunds, and reconciliation.
- Customer Relations Officer - Manages inquiries, complaints, and reviews.
- IT Systems Officer - Manages accounts, roles, security, and audit logs.

Functional Requirements

1. User Authentication & Roles
 - Users should register/login securely.
 - System should assign roles (Customer, Tour Operations, Travel Consultant, Finance, Customer Relations, IT Systems Officer) with appropriate permissions.
2. Tour & Package Search and Browsing
 - Users can search for tour packages by destination, budget, and travel dates.
 - Filters for availability status.
3. Booking & Resource Availability
 - Users can book a tour, hotel, or transport service.
 - System checks real-time resource availability and blocks conflicting bookings.
4. Custom Itinerary & Quotation
 - Users can submit a custom trip request (budget, dates, interests).
 - System automatically calculates the total cost.

5. Payment & Invoicing

- Users can pay online through multiple payment methods.
- System verifies payment, generates invoices/receipts, and manages refunds.

6. Customer Dashboard

- View booking history, current bookings, payment history, and trip details.

7. Staff Dashboards

- Add/edit/remove tour packages, manage resources and bookings.
- Track inquiries, complaints, and reviews.

DEFINE THE SCRUM ROLES

Member	Student ID	Scrum Role	Core Ownership / Responsibility
K.J. Jaswinth	IT25100569	Product Owner	Tour & Package Management
M.H.M. Basith	IT25100552	Scrum Master	Booking & Resource Availability Management
M.K.P.P Ranawake	IT25100561	Developer	Trip planning & Quotation Management
H.M.M.P Herath	IT25100559	Developer	Payment Processing & Invoicing
L.M.B Senanayake	IT25100585	Developer	Customer Communication & Support
H.M.T.D Herath	IT25100644	Developer	User & Account Management

Product Owner

- - Prioritizes features based on customer/staff needs.
- - Maintains the product backlog.

Scrum Master

- Facilitates Scrum events, protects the team from external interference.

Developers:

- build, test, integrate and demonstrate selected sprint work as a cross-functional team.

IDENTIFIED PERSONAS AND USER STORIES

Persona 1: Customer (Tourist)

Owner: K.J. Jaswinth

Primary need: Searches, books, and pays for a trip; must only see their own records.

ID	User Story	Priority
PBI-01	As a customer, I want to search and filter tour packages by destination, budget, and dates so that I can find a suitable trip.	High
PBI-02	As a customer, I want to view real-time availability for a package's transport and accommodation so that I know it can be booked.	High
PBI-03	As a customer, I want to submit a custom trip request with my budget and interests so that I receive a matching itinerary	High
PBI-04	As a customer, I want to view my booking history and trip details in one dashboard so that I can keep track of all my past and upcoming trips without contacting support.	Medium

Persona 2: Tour Operational Manager

Owner: M.H.M. Basith

Primary need: Manages resources and prevents double-booking of vehicles, drivers, and guides

ID	User Story	Priority
PBI-05	As a tour operations manager, I want to receive a conflict warning before confirming a booking so that no vehicle, driver, or guide is double-booked	High
PBI-06	As a tour operations manager, I want to view live availability calendar for all resources so that I can plan assignments accurately.	High
PBI-07	As a tour operations manager, I want to update the booking's status so that operation stays traceable.	Medium
PBI-08	As a tour operations manager, I want to generate a resource utilization report so that I can identify underused or overbooked vehicles and guides.	Medium

Persona 3: Travel Consultant

Owner: M.K.P.P Ranawake

Primary need: Oversees automated itinerary matching and quotation generation for custom trips.

ID	User Story	Priority
PBI-09	As a travel consultant, I want to receive a customer's custom trip request (budget, dates, interests) so that I can build a suitable itinerary for them.	High
PBI-10	As a travel consultant, I want the system to automatically calculate the total cost of the itinerary I build so that pricing stays accurate and consistent	High
PBI-11	As a travel consultant, I want to convert an accepted quotation directly into a confirmed booking with minimal re-entry	High
PBI-12	As a travel consultant, I want to track the status of every quotation so that I can follow up on ones awaiting response	Medium

Persona 4: Finance & Administration Officer

Owner: H.M.M.P Herath

Primary need: Controls payment verification, duplicate handling, refunds, and reconciliation.

ID	User Story	Priority
PBI-13	As a finance officer, I want to verify payment before a booking is confirmed so that only paid bookings are finalized.	High
PBI-14	As a finance officer, I want to flag a duplicate transaction ID for review so that a customer is not charged twice	High
PBI-15	As a finance officer, I want to record a decision on a refund request with a reason that the outcome is accountable.	Medium
PBI-16	As a finance officer, I want to generate a reconciliation report of all transactions so that mismatched financial records can be identified	Low

Persona 5: Customer Relations Office

Owner: S,M,L.M.B Senanayake

Primary need: Manages inquiries, complaints, and reviews across all communication channels.

ID	User Story	Priority
PBI-17	As a customer relations officer, I want every complaint and inquiry to become a trackable ticket with a status so that nothing gets lost across channels.	High
PBI-18	As a customer relations officer, I want a ticket to be automatically assigned to the correct department with a priority level so that urgent issues are handled first.	High
PBI-19	As a customer relations officer, I want to update the status of an inquiry (Open, In Progress, Resolved) so that the team knows still needs attention	Medium
PBI-20	As a customer relations officer, I want to respond to a customer review so that I can address negative feedback publicly	Low

Persona 6: IT Systems Officer

Owner: H.M.T.D Herath

Primary need: Controls accounts, roles, audit access, and authorized reports

ID	User Story	Priority
PBI-21	As an IT systems officer, I want to create a staff account with an assigned role so that the employee starts with the correct access	High
PBI-22	As an IT systems officer, I want a user's account to lock after repeated failed login attempts so that unauthorized access attempts are stopped	High
PBI-23	As an IT systems officer, I want to update a staff member's role when they change positions so that their access always matches their current job	Medium
PBI-24	As an IT systems officer, I want to deactivate a staff account without deleting its history so that records are preserved after a resignation	Medium

Product Backlog

The backlog is ordered first by business priority and then by dependency. High denotes core, security, transaction, or safety-critical capability; Medium denotes essential supporting capability; and Low denotes recovery or reporting enhancements that follow the operational core.

Priority Rationale and Distribution

Priority	Count	Selection Rule	Planned Position
High	10	Core booking, access, security, or transaction control	Earliest dependency-valid sprint
Medium	11	Essential dependent operational capability	Sprints 1-4 by dependency
Low	4	Deferrable recovery or reporting enhancement	Sprint 4

Rank	ID	Persona	User Story	Priority
1	PBI-21	IT Systems Officer	As an IT systems officer, I want to create a staff account with an assigned role so that the employee starts with the correct access	High
2	PBI-01	Customer	As a customer, I want to search and filter tour packages by destination, budget, and dates so that I can find a suitable trip	High
3	PBI-06	Tour Operations Manager	As a tour operations manager, I want to view live availability calendar for all resources so that I can plan assignments accurately	High
4	PBI-05	Tour Operations Manager	As a tour operations manager, I want to receive a conflict warning before confirming a booking so that no vehicle, driver, or guide is double-booked	High
5	PBI-02	Customer	As a customer, I want to view real-time availability for a package's transport and accommodation so that I know it can be booked	High
6	PBI-22	IT Systems Officer	As an IT systems officer, I want a user's account to lock after repeated failed login attempts so that unauthorized access attempts are stopped	High
7	PBI-09	Travel Consultant	As a travel consultant, I want to receive a customer's custom trip request (budget, dates, interests) so that I can build a suitable itinerary for them.	High
8	PBI-10	Travel Consultant	As a travel consultant, I want the system to automatically calculate the total cost of the itinerary I build so that pricing stays accurate and consistent	High
9	PBI-13	Finance Officer	As a finance officer, I want to verify payment before a booking is confirmed so that only paid bookings are finalized.	High
10	PBI-17	Customer Relations Officer	As a customer relations officer, I want every complaint and inquiry to become a trackable ticket with a status so that nothing gets lost across channels.	High

Rank	ID	Persona	User Story	Priority
11	PBI-11	Travel Consultant	As a travel consultant, I want to convert an accepted quotation directly into a confirmed booking with minimal re-entry	High
12	PBI-03	Customer	As a customer, I want to submit a custom trip request with my budget and interests so that I receive a matching itinerary	Medium
13	PBI-07	Tour Operations Manager	As a tour operations manager, I want to update a booking's status (Pending, Confirmed, Ongoing, Completed, Cancelled) so that operations stay traceable	Medium
14	PBI-04	Customer	As a customer, I want to view my booking history and trip details in one dashboard so that I can keep track of all my past and upcoming trips without contacting support	Medium
15	PBI-14	Finance Officer	As a finance officer, I want to flag a duplicate transaction ID for review so that a customer is not charged twice	Medium
16	PBI-12	Travel Consultant	As a travel consultant, I want to track the status of every quotation so that I can follow up on ones awaiting response.	Medium
17	PBI-18	Customer Relations Officer	As a customer relations officer, I want an inquiry to be automatically routed to the correct department so that customers get help faster	Medium
18	PBI-15	Finance Officer	As a finance officer, I want to record a decision on a refund request with a reason so that the outcome is accountable	Medium
19	PBI-19	Customer Relations Officer	As a customer relations officer, I want to update the status of an inquiry (Open, In Progress, Resolved) so that the team knows what still needs attention.	Medium
20	PBI-23	IT Systems Officer	As an IT systems officer, I want to update a staff member's role when they change positions so that their access always matches their current job	Medium
21	PBI-24	IT Systems Officer	As an IT systems officer, I want to deactivate a staff account without deleting its history so that records are preserved after the resignation	Medium
22	PBI-08	Tour Operations Manager	As a tour operations manager, I want to generate a resource utilization report so that I can identify underused or overbooked vehicles and guides	Low
23	PBI-20	Customer Relations Officer	As a customer relations officer, I want to respond to a customer review so that I can address negative feedback publicly.	Low
24	PBI-16	Finance Officer	As a finance officer, I want to generate a reconciliation report of all transactions so that mismatched financial records can be identified	Low

Sprint Planning

The 24 product backlog items are divided across four sprints (six stories each), following the ranked dependency path from access/package foundations, through booking and payment, to support and reporting.

Sprint	Goal	Stories
Sprint 1	Establish secure accounts, publish searchable packages, enable conflict-free booking	PBI-21, PBI-01, PBI-06, PBI-05, PBI-02, PBI-22
Sprint 2	Enable consultant-led itinerary/quotation flow and secure payment-to-confirmation	PBI-09, PBI-10, PBI-13, PBI-03, PBI-07, PBI-11
Sprint 3	Deliver ticketing, routing, refunds, and quotation-tracking workflows.	PBI-14, PBI-12, PBI-17, PBI-18, PBI-04, PBI-15
Sprint 4	Complete recovery, audit, reassignment, and reporting features	PBI-19, PBI-23, PBI-24, PBI-08, PBI-20, PBI-16

1st Sprint

Sprint Goal: Establish secure accounts, publish searchable packages, and enable conflict-free booking foundations

Task Hours: 71 hours

Selected User Stories (according to priority and dependency)

Sprint ID	PBI	User Story	Priority
SP1-01	PBI-21	As an IT systems officer, I want to create a staff account with an assigned role so that the employee starts with the correct access	High
SP1-02	PBI-01	As a customer, I want to search and filter tour packages by destination, budget, and dates so that I can find a suitable trip	High
SP1-03	PBI-06	As a tour operations manager, I want to view live availability calendar for all resources so that I can plan assignments accurately	High
SP1-04	PBI-05	As a tour operations manager, I want to receive a conflict warning before confirming a booking so that no vehicle, driver, or guide is double-booked	High
SP1-05	PBI-02	As a customer, I want to view real-time availability for a package's transport and accommodation so that I know it can be booked	High
SP1-06	PBI-22	As an IT systems officer, I want a user's account to lock after repeated failed login attempts so that unauthorized access attempts are stopped	High

Sprint Backlog - Task Assignments and Ownership

User Story: PBI-21 - Build staff account creation with role assignment (Owner: [H.M.T.D Herath])

Task ID	Task	Hours
T-01.1.1	Design admin UI for staff account creation	4
T-01.1.2	Create backend API to store new staff accounts	6
T-01.1.3	Validate role assignment and required fields	2
T-01.1.5	Test staff account creation flow	2

User Story: PBI-01 - Build package search/filter with availability display (Owner: [K.J. Jaswinth])

Task ID	Task	Hours
T-01.2.1	Design search/filter interface	3
T-01.2.2	Implement backend search API	4
T-01.2.3	Enable filtering by destination, budget, and date	2
T-01.2.4	Add availability status indicator to results	2
T-01.2.5	Test search feature with sample package data	1

User Story: PBI-06 - Build live resource availability calendar (Owner: [M.H.M. Basith])

Task ID	Task	Hours
T-01.3.1	Design calendar UI for resource availability	4
T-01.3.2	Implement backend query for resource status	5
T-01.3.3	Support daily/weekly/monthly view toggle	3
T-01.3.4	Highlight already-assigned resources	2
T-01.3.5	Test calendar accuracy with sample bookings	2

User Story: PBI-05 Implement Booking Conflict Detection and Alerts (Owner: [M.H.M. Basith])

Task ID	Task	Hours
T-01.4.1	Design conflict-warning UI element	3
T-01.4.2	Implement overlap-detection logic (date range check)	4
T-01.4.3	Block booking confirmation on detected conflict	2
T-01.4.4	Suggest alternative resource on conflict (optional)	2
T-01.4.5	Test conflict detection with overlapping bookings	2

User Story: PBI-02 Build real-time package availability view (Owner: [K.J. Jaswinth])

Task ID	Task	Hours
T-01.5.1	Design package availability display	3
T-01.5.2	Link transport/accommodation status to package view	3
T-01.5.3	Test availability display accuracy	1

User Story: PBI-22 Build account lockout after failed logins (Owner: [H.M.T.D Herath])

Task ID	Task	Hours
T-01.6.1	Implement failed-login attempt counter	3
T-01.6.2	Implement account lockout after threshold reached	4
T-01.6.3	Display lockout message and recovery option	2
T-01.6.4	Test lockout flow with repeated failed attempts	2

Task ID	Role	Task	Hours
T-01.PO	Product Owner - K.J. Jaswinth	Order backlog, confirm acceptance criteria, review evidence, accept/reject increment	2
T-01.SM	Scrum Master – M. H. M. Basith	Facilitate planning, Daily Scrum, review, retrospective, remove impediments	2

2nd Sprint

Sprint Goal: Secure the itinerary-matching and payment-to-confirmation flow information.

Task Hours: 83 hours

Selected User Stories (according to priority and dependency)

Sprint ID	PBI	User Story	Priority
SP2-01	PBI-09	As a travel consultant, I want to receive a customer's custom trip request (budget, dates, interests) so that I can build a suitable itinerary for them.	High
SP2-02	PBI-10	As a travel consultant, I want the system to automatically calculate the total cost of the itinerary I build so that pricing stays accurate and consistent	High
SP2-03	PBI-13	As a finance officer, I want to verify payment before a booking is confirmed so that only paid bookings are finalized.	High
SP2-04	PBI-03	As a customer, I want to submit a custom trip request with my budget and interests so that I receive a matching itinerary	Medium
SP2-05	PBI-07	As a tour operations manager, I want to update a booking's status (Pending, Confirmed, Ongoing, Completed, Cancelled) so that operations stay traceable	Medium
SP2-06	PBI-11	As a travel consultant, I want to convert an accepted quotation directly into a confirmed booking with minimal re-entry	High

Sprint Backlog - Task Assignments and Ownership

User Story: PBI-09 Implement Custom Trip Request Intake and Itinerary Builder (Owner: [M.K.P.P.Ranawake])

Task ID	Task	Hours
T-02.1.1	Design matching-engine logic (filters: budget/dates/interests)	5
T-02.1.2	Implement backend matching query	6
T-02.1.3	Cross-check matched components against availability	3
T-02.1.4	Assemble matched results into a draft itinerary	2
T-02.1.5	Test matching engine with sample requests	2

User Story: PBI-10 Implement Automated Itinerary Cost Calculation (Owner: [M.K.P.P.Ranawake])

Task ID	Task	Hours
T-02.2.1	Design cost-calculation logic (sum of components)	4
T-02.2.2	Implement backend cost calculation API	5
T-02.2.3	Recalculate cost automatically on itinerary change	3
T-02.2.4	Test cost accuracy with sample itineraries	2

User Story: PBI-13 - Build payment verification before confirmation (Owner: [H.M.M.P Herath])

Task ID	Task	Hours
T-02.3.1	Design payment verification UI/flow	3
T-02.3.2	Integrate payment gateway verification response	6
T-02.3.3	Update booking status upon verified payment	2
T-02.3.4	Handle failed/timeout payment cases	2
T-02.3.5	Test payment verification flow end-to-end	2

User Story: PBI-03 Implement Custom Trip Request Submission Form (Owner: [K.J. Jaswinth])

Task ID	Task	Hours
T-02.4.1	Design trip-request form (budget/dates/interests)	3
T-02.4.2	Create backend API to store trip requests	4
T-02.4.3	Validate form inputs	1
T-02.4.4	Trigger matching engine on submission	1
T-02.4.5	Test trip request submission flow	1

User Story: PBI-07 Implement Booking Status Management (Owner: [M.H.M. Basith])

Task ID	Task	Hours
T-02.5.1	Design booking status field and UI indicator	2
T-02.5.2	Implement backend status transition logic	4
T-02.5.3	Restrict status changes to authorized roles	2
T-02.5.4	Test status transitions (Pending to Cancelled, etc.)	2

User Story: PBI- 11 Implement Convert Accepted Quotation to Booking function (Owner: [M.K.P.P.Ranawake])

Task ID	Task	Hours
T-02.6.1	Design "Accept Quotation" UI and add "Convert to Booking" trigger action	3
T-02.6.2	Copy quotation data into new booking	5
T-02.6.3	Check availability & fix mismatches	2
T-02.6.4	Send alerts & test the process	2

Task ID	Role	Task	Hours
T-01.PO	Product Owner - K.J. Jaswinth	Order backlog, confirm acceptance criteria, review evidence, accept/reject increment	2
T-01.SM	Scrum Master – M. H. M. Basith	Facilitate planning, Daily Scrum, review, retrospective, remove impediments	2

3rd Sprint

Sprint Goal: Deliver accountable support, refund, and quotation-tracking workflows

Task Hours: 85 hours

Selected User Stories (according to priority and dependency)

Sprint ID	PBI	User Story	Priority
SP3-01	PBI-14	As a finance officer, I want to flag a duplicate transaction ID for review so that a customer is not charged twice	Medium
SP3-02	PBI-12	As a travel consultant, I want to track the status of every quotation so that I can follow up on ones awaiting response.	Medium
SP3-03	PBI-17	As a customer relations officer, I want every complaint and inquiry to become a trackable ticket with a status so that nothing gets lost across channels.	High
SP3-04	PBI-18	As a customer relations officer, I want an inquiry to be automatically routed to the correct department so that customers get help faster	Medium
SP3-05	PBI-04	As a customer, I want to view my booking history and trip details in one dashboard so that I can keep track of all my past and upcoming trips without contacting support.	Medium
SP3-06	PBI-15	As a finance officer, I want to record a decision on a refund request with a reason so that the outcome is accountable	Medium

Sprint Backlog - Task Assignments and Ownership

User Story: PBI-14 - Build duplicate transaction flagging (Owner: [H.M.M.P Herath])

Task ID	Task	Hours
T-03.1.1	Design duplicate-detection logic (transaction ID)	4
T-03.1.2	Implement backend duplicate-check on payment submit	5
T-03.1.3	Flag and log duplicate attempts for Finance review	2
T-03.1.4	Test with duplicate and unique transaction scenarios	2

User Story: PBI-12 Implement Quotation Status Tracking (Owner: M.K.P.P Ranawake)]

Task ID	Task	Hours
T-03.2.1	Design quotation-status field and UI badge	3
T-03.2.2	Implement status transitions (Draft/Sent/Approved/etc)	5
T-03.2.3	Display status in consultant dashboard	2
T-03.2.4	Test all quotation status transitions	2

User Story: PBI-17 - Implement Inquiry and Complaint Ticket Management (Owner: [L.M.B Senanayake])

Task ID	Task	Hours
T-03.3.1	Design centralized inquiry inbox UI	5
T-03.3.2	Implement backend to capture inquiries from all sources	7
T-03.3.3	Display inquiry list with filters	3
T-03.3.4	Test inquiry capture and listing	3

User Story: PBI-18 Implement Automatic Ticket Routing & Priority Assignment (Owner: L.M.B Senanayake)

Task ID	Task	Hours
T-03.4.1	Design routing-rule logic (category/keyword matching)	5
T-03.4.2	Implement backend auto-routing on inquiry submission	6
T-03.4.3	Test routing accuracy across categories	3

User Story: PBI-04 Implement Customer Booking History Dashboard (Owner: [K.J. Jaswinth])

Task ID	Task	Hours
T-03.5.1	Design dashboard UI (past/upcoming trips, status filters)	3
T-03.5.2	Build backend API to fetch a customer's booking records	4
T-03.5.3	Implement filter/sort by date and status	3
T-03.5.4	Build trip-detail view	2

User Story: PBI-15 Implement Refund Decision Recording and Reason Tracking (Owner: [H.M.M.P Herath])

Task ID	Task	Hours
T-03.6.1	Design refund-decision UI (approve/reject + reason)	3
T-03.6.2	Implement backend refund-decision storage	5
T-03.6.3	Restrict refund approval to authorised Finance role	2
T-03.6.4	Test refund decision flow	2

Task ID	Role	Task	Hours
T-01.PO	Product Owner - K.J. Jaswinth	Order backlog, confirm acceptance criteria, review evidence, accept/reject increment	2
T-01.SM	Scrum Master – M. H. M. Basith	Facilitate planning, Daily Scrum, review, retrospective, remove impediments	2

4th Sprint

Sprint Goal: Complete recovery, audit, and reporting features and demonstrate release readiness.

Task Hours: 68 hours

Selected User Stories (according to priority and dependency)

Sprint ID	PBI	User Story	Priority
SP4-01	PBI-19	As a customer relations officer, I want to update the status of an inquiry (Open, In Progress, Resolved) so that the team knows what still needs attention.	Medium
SP4-02	PBI-23	As an IT systems officer, I want to update a staff member's role when they change positions so that their access always matches their current job	Medium
SP4-03	PBI-24	As an IT systems officer, I want to deactivate a staff account without deleting its history so that records are preserved after the resignation	Medium
SP4-04	PBI-08	As a tour operations manager, I want to generate a resource utilization report so that I can identify underused or overbooked vehicles and guides	Low
SP4-05	PBI-20	As a customer relations officer, I want to respond to a customer review so that I can address negative feedback publicly.	Low
SP4-06	PBI-16	As a finance officer, I want to generate a reconciliation report of all transactions so that mismatched financial records can be identified	Low

Sprint Backlog - Task Assignments and Ownership

User Story: PBI-19 - Create interface for staff to change the inquiry status (Owner: [H.M.T.D Herath])

Task ID	Task	Hours
T-04.1.1	Design inquiry status field and UI	2
T-04.1.2	Implement status transition logic (Open/In Progress/Resolved)	4
T-04.1.3	Notify customers on status change	2
T-04.1.4	Test status update flow	2

User Story: PBI-23 - Implement Staff Role Update Functionality (Owner: [H.M.T.D Herath])

Task ID	Task	Hours
T-04.2.1	Design admin UI to select a staff member and change their role	2
T-04.2.2	Build backend endpoint to update role assignment	3
T-04.2.3	Propagate updated access permissions immediately on role change	3
T-04.2.4	Test role-update flow	1

User Story: PBI-24 Implement Staff Account Deactivation with History (Owner: [H.M.T.D Herath])

Task ID	Task	Hours
T-04.3.1	Design account deactivation UI (not delete)	3
T-04.3.2	Implement backend deactivation logic (preserve history)	5
T-04.3.3	Revoke access immediately upon deactivation	2
T-04.3.4	Test deactivation and history preservation	2

User Story: PBI-08 Implement Resource Utilization Reporting (Owner: [M.H.M. Basith])

Task ID	Task	Hours
T-04.4.1	Design report UI (filters: resource type, date range)	4
T-04.4.2	Implement backend report-generation query	5
T-04.4.3	Test report accuracy with sample booking data	2

User Story: PBI-20 Build customer review response functionality (Owner: S.M.L.M.B Senanayake)]

Task ID	Task	Hours
T-04.5.1	Design review-response UI	3
T-04.5.2	Implement backend response storage and publishing	5
T-04.5.3	Test review-response flow	3

User Story: PBI-16 Implement Financial Reconciliation Reporting (Owner: H.M.M.P Herath)]

Task ID	Task	Hours
T-04.6.1	Design reconciliation report UI	3
T-04.6.2	Implement backend matching logic (transaction ID)	4
T-04.6.3	Flag mismatched/missing records	2
T-04.6.4	Test reconciliation accuracy	2

Task ID	Role	Task	Hours
T-01.PO	Product Owner - K.J. Jaswinth	Order backlog, confirm acceptance criteria, review evidence, accept/reject increment	2
T-01.SM	Scrum Master – M. H. M. Basith	Facilitate planning, Daily Scrum, review, retrospective, remove impediments	2

Member Ownership Summary

Member	Role	Total Est. Hours
